Annual Report

To the Dursley Rural District Council

Annual Report of Medical Officer of Health

Population in 1901	11,636
Area in Acres (land only)	26,521
Inhabited houses	2753
Estimated population to July 1904	11,464.

The district consists of eleven parishes Viz:— Cam, Coaley, Dursley, Kingswood, North Nibley, Nympsfield, Owlpen, Slimbridge, Stinchcombe, Uley and Wotton-under-Edge.

Inspector of nuisances;—
Mr. William Webb,
Wresden, Uley.

To the Chairman and Members of the Rural District Council.

Gentlemen,

The Rural District of Dursley is situated on the sides and buttresses of the Western Cotswolds, which hills geologically consist almost entirely of the white lime stone. A lot of clay or marl lies in the valleys and runs to a considerable distance up the hill sides with here and there a bed of gravel.
Many springs of bright clear water rise at the foot of the hills or on the hill-sides which unite in their respective valleys and so form the streams of the district the chief among which

ve the Ham, the Nibley-brook, the Dyers-brook, the Alderley-brook, and the Wickwar-brook.

Streams of the district

The Ham drains Uley, Dursley, and Ham and the greater part of Cooley it empties itself into the Berkeley and Gloucester Canal in the parish of Slimbridge through which parish the canal passes. The Nibley-brook drains the greater part of the parish of North Nibley and empties into the Matford-brook. The Dyers-brook drains Wotton under Edge, the Alderley brook the Alderley part of the parish of Wotton under Edge, these unite at, and drain Kingswood and joins the Little Avon.

The Wickwar-brook drains only a small and remote part of the parish of Kingswood and is chiefly important as forming a boundary between this Rural District and the Chipping Sodbury and Thornbury Rural District. Not one of these streams is used for drinking purposes by human beings.

Villages of the district

The villages which make up the district vary, some are fairly compact while others are scattered and are built upon the hill-sides or on the abutments which run out to different distances in the valley of the Severn. Nympsfield is the only village situated on the top of the hill and this from 700 to 800 ft above sea level, and Slimbridge is the only parish wholly situated in the valley. So that for the most part the district is naturally well drained.

House accommodation

House accommodation is fairly well provided for in all parts of the district except Dursley and Ham.

New buildings

We have inspected 9 new cottages, 1 dwelling-house and 1 dwelling-house and shop during the year. These are situated in the following parishes, namely; 3 in Slimbridge, 3 in Ham, 1 in Cooley and 2 in Stinchcombe, the dwelling-house and

dwelling-house and shop, are situated in Dursley. The cottages are all of a very good class.
There are but few back-to-back houses in the district but those of a class little or no better, I allude to those which have neither window nor door in the back to provide light and air for ventilation through the house.
With regard to sufficiency of open space about the dwellings of the Woking-classes there is little to complain about, and on the whole the surroundings are kept in a fairly sanitary condition.
No action was taken during the year under Part I or II of Housing of the Woking classes act 1890. But under Sec 46 of the Public Health Act 1875 re cleaning and limewashing, two dwellings were visited and inspected, and cleaned and limewashed 1 in Silver St Dursley, the other in Long St Wotton under-Edge.
Supervision is exercised by Your Board in the erection of new houses under the provisions of the Bye-laws with respect to new streets and buildings in that portion of the Rural Sanitary district which comprises the contributory place of Dursley, and under this head three plans of new buildings have been examined by me and passed by Your Board in accordance with the provisions of the said bye-laws.
In other parts of the district new cottages and dwelling houses are inspected by me under Sec 21-25. Sec 35 & 36 and Sec 159 Public Health Act 1875 and Under Sec 6 Public Health (Water) Act 1878.
There is no complete Sewerage System in the district. But the work of laying the Dursley and Cam Sewerage System was carried on

vigorously by Mr. Riley the contractor of Cheltenham during the year, so that by the end of the year all the main sewers were laid and a good deal done towards the completion of the outfall works. The total expenditure during the year has reached for Dursley the sum of £6, 535. 12 and for Cam the sum of £2, 5 35. 4. 4.

Wotton under Edge has no proper system of sewerage, but during the year there has been carried out a further extension of the work of sewering the town begun in the previous year, so that during 1904 a new sewer was laid along Bear Street, down the Old Town and along the Culverhay. The Street gutters have also been improved.

This work has been carried on out of the rates. This will help to do away with the old loose-stone sewers, and cesspools in the town.

Provision for the thorough ventilation of the sewers should have been carried out at the same time as the new sewers were laid. It is a necessity that it should be done and done well, for sewer gas is no sweeter or more health giving inhaled from a defective manhole or low ventilating shaft than from the old open iron-grating that used to cover the entrance to a drain, either to keep in the sewer gas or keep out the dogs and cats.

The sewers in the other parts of the district are both short and small. None of the house drains and sewers are constructed of loose-stone. But all new house-drains are laid in Sanitary pipes.

But little sewage enters the Cam until it reaches Dursley, but from Dursley and Cam at the present all the sewers of Wotton under Edge empty into the Dyers-brook.

the Cam and the Dyers. brook are the most polluted streams in the district.
The sewage which finds its way into the other streams of the district is but small in quantity and what excrement is not water borne is either collected in cesspools, pail-closets or privies.
There are a great many pail-closets in Wotton-under Edge, some in Dursley, and some in other parts of the district, but the most common method of collecting it is by the old fashioned privy with a high vault, and this in my opinion, is the most objectionable and dangerous of all.
These are usually emptied once a year by the occupier. Cesspools are usually emptied by the occupier.
In Dursley the pail closets are emptied once a week by the Public Scavenger who removes at the same time the house refuse.
At Wotton under Edge the same method is carried out once a week by the Public Scavenger.
In Cam the public scavenging done amounts to removal of the house refuse only, and this is done once a week.
The public scavengers of the district are appointed by Your Board.
In all other parts of the district what is done, is done by the occupiers or owners.

Water Supply

The water supply of the district is as follows;-
Cooley has possessed a water supply of its own for many years and was the first in order of time, this is supplied by a spring to the South of the village on the hill-side, and to the village by gravitation, the water-main being carried down the side of the main road, and supplied to the

villagers by means of stand-pipes, placed at different distances from each other. And a few have got it laid on.
The out lying parts of the village are supplied by dip wells.
Kingswood has a water supply, the source of this is in a wood on the hill side to the south of Wotton under Edge this also is supplied by gravitation only.
Wotton under Edge has had a water supply for a certain area since 1894. the area of supply has been extended and the supply has also been increased, the original supply was from a spring near the top of Coombe Hill, this was found to be insufficient so that some springs were collected in the Coombe valley, this is pumped to the reservoir on the side of the Coombe Hill, which also collects the original supply, and is thence supplied to the town by gravitation.
Dursley also has a water supply this is from a deep well about a mile from, and to the south-east of the town, is pumped to a reservoir on the hill-side near Whiteway, and is supplied to the town by gravitation.
During the year 19 new connections have been made to the public supplies in the district.
There is a small supply in Upper Cam and one in Lower Cam these are by cisterns with taps and stand-pipes which are placed in convenient situations.
all the remaining parishes are supplied by springs deep or shallow wells some with many without pumps.
All these water supplies are under the control

of your Board.
All the water in the district is more or less hard, but for the most part it may be said to be fairly well supplied with wholesome water.
The rainfall after February being below the average, many wells in the District before the year was out were very low, or nearly dry.

Common Lodging Houses.
Under the Bye-laws relating to common lodging houses We made four inspections in Wolton under Edge, two in April and two in November and found them in a satisfactory condition.
There is no common lodging house in Dursley.

Slaughterhouses. Between Sept 27th and Oct 27th I with Mr. Webb visited and inspected all the slaughterhouses in the district, and the number inspected being 31 there we found 29 satisfactory, and in two we advised limewashing.
The slaughterhouses in Dursley were inspected under the Bye-laws relating to slaughterhouses and were found to be in a satisfactory condition.

Dairies, Cowsheds and Milkshops.
Under the Order 1886 relating to the above 66 visits and inspections have been made with the result that drains have been taken out of two dairies, one partly repaved, and one cowshed limewashed.
There was one case of dangerous infectious disease in a milkshop, but everything was done to prevent the spread of disease and the means taken appear to be successful.

Factory and Workshops Act 1901.
The Inspectors Journal has registered 74 different entries during the year. 23 are described as Factories and 51 as Workshops and 1 Laundry.

It must be borne in mind that our present Inspector did not commence inspections under the Act until July, and if the late Inspector made any inspections they were not entered in the Journal only one Workshop was examined by the deputy in the vacancy caused by the death of the late Inspector).

The following are the business headings under which they are placed Viz:—

Tailors	2
Bakers	35
Elastic Web Makers	1
Leather board Makers	1
Printers	2
Rope makers	2
Carpenters	2
Saddlers	2
Plumbers	3
Wheelwrights	2
Wood turners & Sawyers	2
Millers	3
Iron founders	1
Churn Makers	1
Engineers	3
Rick cloth makers	1
Blacksmiths	2
Brewers	1
Aerated Water makers	2
Builders	4
Cycle Makers	1
Laundress	1
Edge-tool-makers.	1

There have been 113 visits made to the above Factories

Workshops + Laundry by us during the year. With the following results, that there was found under:-

(a) Cleanliness (sec (2(1)) a want of cleanliness in one, remedied
(B) Ventilation (S. 2(1)) all Satisfactory.
(b) Overcrowding (S. 2(1)3) not any.
(D) Want of drainage of floors (S 8) all Satisfactory.
(E) Other Nuisances (effluvia from drains +c) (S 2(2)) One, remedied
(F) Sanitary accommodation Part III Public Health Act 1890. Insufficient - One, remedied.
(G) Sanitary accommodation Part III Public Health Act 1890 unsuitable or defective one, remedied.
(H) Underground bakehouses (S 101) not any in district.
(I) as to W.C, E.C. Ashpits +c (Sec 97) all Satisfactory.
(J) as to fitness on Sanitary grounds (S 98) 1, remedied.
(K) Sleeping places on same level (S 100) not any.
(L) Failure to affix abstract of Factory & Workshops Act (Sec 133) One, and the certificate forwarded to H.M. Inspector.
(M) Matters notified by H.M. Inspector. One.
(N) Reports of action taken sent to H.M. Inspector, One.
(O) Homework S 107-115. No list received.
(P) Out workers four.

One case of Diphtheria occurred in a house where dressmaking was done, this was stopped until after the house had been thoroughly disinfected and cleansed.

Nuisances. Besides the nuisances inspected by Mr Watt during the year I have made twelve visits of inspections to farm yards, privies, cesspools, overcrowding, foul ditches +c and where a nuisance was found to exist, it has been remedied as far as possible.

Dwellings. Under this head I have made 13 visits, they are for the most part concerned with infectious diseases not notifiable in this district and one was to the

Common lodging house at the Cloud, Wotton under Edge when a case of measles occurred there, another of a different nature to Wickwar when a Local Government Board Enquiry was held there at the Town Hall, presided over by Col. A. G. Durnford, re a loan the Chipping Sodbury Rural District Council desired to take up for the purpose of improving the Wickwar Sewage Works.

Water Analysis. Six samples of water have been examined by me during the year, and in all cases the result was satisfactory.

Prosecutions. There has been no prosecution during the year.

Attendance at Meetings.

I was present at 9 meetings of the Board during the year.

Table III The Act for the compulsory Notification of dangerous infectious disease 1889, was adopted by your Board on Nov 4th 1898. Under the above Act 49 cases were notified during the year, there were 28 of Scarlet fever, 18 of Diphtheria, 2 of Erysipelas and 1 of enteric fever.

Of the several districts there were 34 in the Dursley district, 2 in the Uley, 12 in the Wotton under Edge district and 1 in the Workhouse.

Of the respective parishes there occurred in Dursley 4 of Scarlet fever, 13 of Diphtheria, 1 of Typhoid fever, and 1 of Erysipelas; in Cam 10 of Scarlet fever, and 3 of Diphtheria; in Stinchcombe 2 of Diphtheria; and in Slimbridge 1 of Erysipelas; in Uley 2 of Scarlet fever; in Ringwood 1 of Scarlet fever; and in Wotton under Edge 11 of Scarlet fever. No case occurred in Coaley, Owlpen, Nympsfield or North Nibley.

Dursley is the parish which suffered most from dangerous infectious disease during the year th

most prevalent one being Diphtheria, due in all probability to breaking up of the ground in the vicinity of the old loose-stone drains in the town preparatory to the laying of the new sewers.
Of the seasons of the year there were 12 notified in the first, 11 in the second, 14 in the third and 12 in the fourth quarter.
Of the months cases were notified in every month in the year, and three were the lowest in any month. Six was the highest reached and in April and October.

Removals to the Hosp. Seven cases have been removed to the infectious hospital during the year, all of Scarlatina, and being 3 from the Quarry, 1 cam. 1 from the Workhouse, 1 from Wotton under Edge; and 1 from Lower Cam at the parents wish as a private patient.

Dangerous infectious sickness.
There have been 43 cases of dangerous infectious sickness entered in the District Medical Officer's Relief Books during the year.
All notifiable were duly notified.
These were 12 of diarrhoea, 16 of whooping-cough, 11 of influenza, 3 of scarlet-fever and 2 of measles.
There were in Dursley district and Workhouse 5 of diarrhoea, 2 of influenza, and 1 of measles; in the Uley district, 2 of diarrhoea and 1 of whooping cough; in the Wotton under Edge district, 5 of diarrhoea 6 of whooping-cough, 9 of influenza, 3 of Scarlet-fever and 1 of measles.
Measles and whooping-cough are not notifiable in this district.
All notifiable diseases where there is urgency are visited by Mr. Webb or myself as soon as possible

after the receipt of the notification certificate.

Means taken to prevent the spread of disease.

1. Visiting the case as early as possible as above.
2. The Inspector sends at once printed instructions relating to isolation disinfection &c to all cases.
3. In all cases where there is a child or children attending a school or schools from an infected home there is forwarded, memorandum (C) giving information as to the nature of the infection in such and such household &c to the Managers School masters or School Mistress of such School or Schools, as early as is convenient. Of these 20 have been forwarded during the year.
4. When the infected person has recovered, the house thoroughly disinfected and cleansed, and also inspected a certificate is forwarded of "Proper disinfection" to the afore said School Authorities and of these 10 have been forwarded during the year.
5. re Closing of Schools.
   The Public Elementary Schools in Coaley were closed 33 days in March and April in consequence of an outbreak of whooping-cough.
   In Wotton under Edge from March 9th to April 8th on account of an outbreak of mumps.
   The British School Wotton under Edge from Dec 9th to 31st because of an outbreak of whooping-cough.
   The Stinchcombe School from Dec 13th to 31st in consequence of an outbreak of measles.
6. We may mention again here the removals to the Infectious hospital, as stated under notification of dangerous infectious disease, where the infected cannot be properly isolated or because of the nature of the work carried on, on the infected premises.
7. Bacteriological diagnosis of dangerous infectious

disease was employed in 11 cases, 10 being suspected cases of Diphtheria; Verified in 7 and negatived in three; One suspicious case Phthisis, negatived.

The Isolation Hospital.

This is situated at the Moors, in the parish of Cooley subdistrict of Ulley. It is intended for Small-pox only, and is capable of accommodating four persons.

Breakheart Hill Isolation hospital.

There is a piece of land still belonging to your Board, held as a site for the above purpose a fine site: but doubtful water supply. This was tested by W. Weeks and myself during 1904 for some time, but the daily yield was insufficient to justify any forward movement. & so that the scheme is again allowed to rest.

Vital Statistics.

Table I The official account of the census year 1901 placed the population of this district at 11,636 which was lower than I had estimated it for that year. The estimation of the population in the middle of 1904 has been made on the proportional loss in the population between the census year 1891 and 1901. and this give as the total population of the district 11,464. All the calculations are based upon the estimated population.

Table II This estimation of the population places the population of the Dursley district & Workhouse at 5,149, of the Ulley district at 1833, and of the Wotton under Edge District at 4482.

The births registered in the whole district during the year are 266 of these 140 are males, and 126 females with a birth rate of 23.2 per thousand of estimated population living at the middle

of the year. This is called the "crude birth-rate", in 1903 it was 24·5, for the County of Gloucester it was 24·6, and for all England and Wales it was 28·4.

For the different districts it is as follows; Dursley district 119, birth-rate 23·1. Uley district 44 birth-rate 24· Wotton under Edge 103 birth-rate 22·9.

Table IV The deaths registered in the district during the year are 141 but 9 persons belonging to the district died in Public Institutions outside the district making the total number of deaths registered of persons belonging to the district 150, and of these 82 were males and 68 females with a net death-rate of 13·, this is called "the general death-rate" the death-rate for the whole district in 1903 was 13·8. For the County of Gloucester it was 13·2 and for all England and Wales 15·4.

The deaths and death-rate for the different districts are Dursley 62, death-rate 12·; Uley district 24, death-rate 13·; Wotton under Edge district 64 death-rate 14·3. In 1904 Dursley has the lowest death-rate and Wotton under Edge the highest.

The deaths occurring in the advanced periods of old age between 70-80 are 31, between 80-90 are 23, and between 90 and 100 are 2.

Infant mortality.

The deaths registered in the district under one year are 19, and the rate of infant mortality is 71·4, this is the number of deaths under 1 year per thousand births, in 1903 it was 84·8, for the County of Gloucester it was 89· and for all England and Wales it was 132.

The rate for Dursley district is 50·4.

The rate for Uley district is 113·

The rate for Wotton under Edge district is 77·6.

Zymotic disease.

The seven principle Zymotic diseases are Small-pox, measles, scarlatina, diphtheria and membranous croup, whooping-cough, fevers, and diarrhoea and dysentery were the cause of death in four persons, 1 died of measles, 1 of whooping-cough, 1 of diphtheria and 1 of diarrhoea, and the Zymotic death-rate is 0·34, in 1903 it was 0·43. One died of measles death rate 0·08, and 1 of whooping-cough death-rate 0·08 in the Wotton-under-Edge district, 1 of diphtheria death-rate 0·08 in the Dursley district, 1 of diarrhoea death-rate 0·08, and 1 of enteritis death rate 0·08 in the Uley district. The 1 death from diphtheria was the only death from any of the notifiable diseases during the year.

Three died of epidemic influenza. 14 of phthisis death-rate 1·22, two of other tubercular diseases. Four of cancer death-rate 0·34. Twenty one of acute respiratory diseases death-rate 1·84. Three of other diseases of the respiratory organs.

One of Cirrhosis. Two of premature birth. One of diseases and accidents of parturition. Fifteen of heart disease. Five of accidents. Three of suicide. And 71 of all other causes.

There was no death from Small-pox, Scarlet fever, croup, fevers, Cholera, plague, puerperal-fever, erysipelas, other Septic diseases, pleurisy or venereal disease during the year.

Prospective:—

I The completion of the Dursley & Cam Sewerage System.

II The making of the House connections in the above system.

III Further improvements in the drainage of Wotton-under-Edge &c &c.

Eagle House
Dursley
Feb 20th 1905.

I remain
Your obedient Servant
Francis Jas Jones
Medical Officer of Health

Annual Report of the Inspector of Nuisances for the Year ending December 31st 1904.

To the Dursley Rural District Council.

Gentlemen,

I beg to submit the annual report of the year's work.

I have made two inspections to each of the bakehouses in the district. I have had one limewashed, and one repaired and a new ceiling. All the others I found satisfactory.

I have also inspected 78 factories and workshops.

I have had a new privy built to one, and one limewashed.

The number of registered dairies in the district is 66, and I have found that in a great many cases the milk is never taken into the dairy, but refrigerated in a suitable place outside.

I have had the drains in two dairies taken out, and one partly repaired.

I have had one cowshed limewashed.

There are two common lodging-houses in the district, which I have visited four times and found them satisfactory.

I have visited the whole of the slaughterhouses in the district with the Medical Officer of Health.

Nuisances reported and abated.

Public Health Act 1875.

Privies:-	Number of privy-vaults emptied	73
and	" earth-closets constructed	6
Water-closets.	" new receptacles provided	8
	" cesspits filled in	5
	" closets supplied with water	29

Drains:-

Surface drains trapped	14
Drains found defective and remedied	14
Drains Ventilated	3
Yards drained and paved	2
Houses connected to Sewer	49

Dwelling Houses:-

Dilapidated Houses repaired	2
Houses Limewashed	4
Overcrowding	1
	156

Infectious disease:-

Cases Notified	49
" Visited and Reported on	49
Houses disinfected	41
Cases isolated at Infectious hospital	7

General:-

Complaints received	21
Nuisances Reported	106
Nuisances Abated	104
Notices Served	106
Statutory notices Served	62

I am Gentlemen
Your Obedient Servant
William Webb
Sanitary Inspector

February 1905.
